Pulsed NIR light

iAllow

I-ALLOW System provides a compact and cost effective solution in all cases where there is need for:

- High visibility in harsh and off weather conditions (fog, snow, heavy rain, dark nights, ...)
- Multiple spectral imaging system (color & IR imaging, demosaicing and image composition)
- Distance targeting (filter based on distance to cut off noise of front and back views)
- Easy Integration in multi-vendors' deployments (based on open standards to operate with Video Management Systems)
- Easy Installation in critical environment (railway station, tunnel and motorway, vessels and pilot boats)
- Easy Maintenance in inaccessible locations (remote control of all configuration and functional parameters)
- Integrated Video Content Analysis for automatic alerts (checking vehicles, people, objects...) and NVR
